

KEMMLIT | Walk through cubicles

Our CRONUS and PRIMO Cubicle ranges are flexible enough to meet the increasingly popular demand for 'walk-through' changing rooms. They can both be configured with entry/exit doors that lock in unison via a locking shelf.

One example of where the walk through system is ideally suited is to separate wet and dry sections of swimming pool changing areas. Unoccupied cubicles are seen as the access to the locker area and onto the poolside. A central locking mechanism, which releases both doors on departure, controls the 2 doors.
